	Cargill / Redwood City "Saltworks"		SPN	CA	JD for proposed mixed use residential on the SF Bay margin.	Applicant asked EPA to do the JD; we offered technical assistance to Corps. RHA call is in process with SPN; history of Corps HQ intervention. Enviro's watching closely. Cargill meeting with HQ the week of 12/16/13 on science advisory board report for waters of the U.S. We received two guidance memos issued by Corps HQ in January and March 2014 that District must follow in determining CWA and RHA jurisdiction. The memos assert there is no CWA jurisdiction on the site because the "liquids" on site do not met the definition of "water" under the CWA. The Corps analysis relays in part on EPA effluent regulations. We are currently reviewing our options with OW and OGC.
